

Zoho Finance Plus

Benefits of the integrated Finance suite for businesses

Multiple apps, single platform

All Zoho Finance apps are built from the ground up to work together seamlessly. Information entered in one app will be reflected in the rest, which means your data is up to date always.

Improved quote-to-cash process

When sales people generate estimates and orders in one application, they are immediately available in connected applications for relevant teams to fulfil the orders promptly, invoice the customer, and collect payments.

Better business decisions

With all the back office apps connected, there is no need to tie together data from different sources manually. Real-time information flows between the apps so you can make more informed business decisions.

Faster employee reimbursements

Zoho Expense automates your reimbursement approval flow, making it easy for your employees to claim reimbursements. All of their expenses fall into the right accounts automatically.

Everything you need to manage your finances and operations

Books

Powerful accounting platform for businesses

Inventory

Inventory and order management

Expense

End to end Travel & Expense Management

Billing

Smarter billing for your subscription business

Invoice

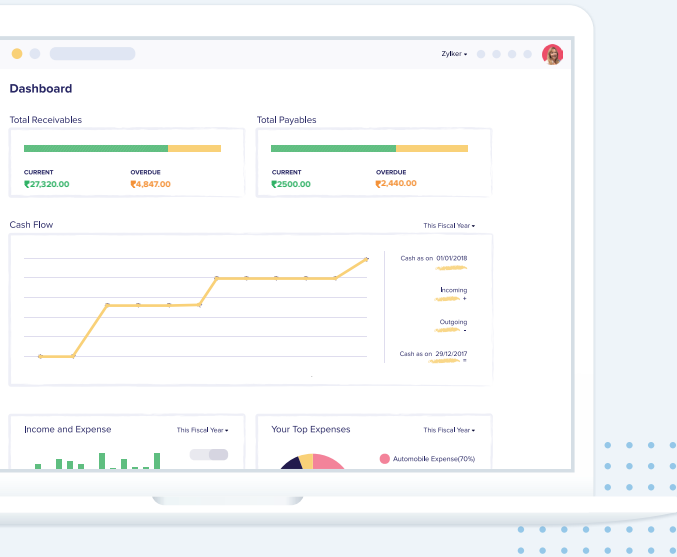

Hassle-free invoicing
